

Summary

Overview

- Loops allow us to execute code multiple times
- Execution ends when the condition is no longer true
- Be careful with infinite loops!

Anatomy of a while loop

```
let i = 1;  
while(i <= 100) {  
    total += i;  
    i++;  
}
```

Loop executes
while this
condition is **true**

Code inside
the loop is
executed on
every **iteration**

Important to
prevent **infinite**
loops
